

Business Logic, simplified

Pitch

Business Logic As A Service

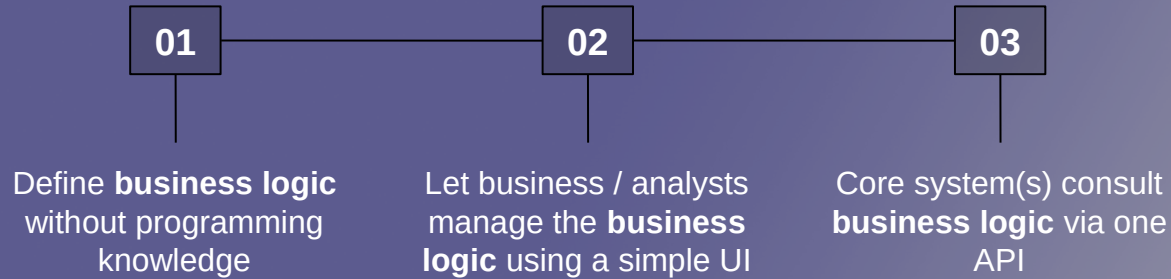

Scattered Logic

Big boss. Can you trace, explain, update the **business logic** of your system, on demand :-

- Without checking code ?
- Without the vendor ?
- While explaining each step in the computation ?
- From the comfort of your home or on vacation ?

THE TRUTH: You cannot, yet. Even the implementer is always forced to consult the code !

...solution...

...the need for speed...

E commerce

Change discount logic before a flash sale goes live in the next few minutes.

Healthcare

Roll out new compliance rules, coverage criteria and rates overnight.

Micro Finance

Adjust deposit and withdrawal rules instantly for compliance or when anticipating malpractice.

Insurance

Adjust premium calculation formulas, rates and exclusions in minutes, not weeks.

Business logic As A Service

For Staff

Explain the rules.
Justify the calculations.
Update the rules, the steps.
No code.

Organization

Own the logic.
Move fast.
React fast.
Be first.

Tech

Access the logic via API.
Single point of reference.
Low code.

Example 1 - Basic Logic

Category	Is one of	[VIP, PREMIUM, BASIC]																								
Quantity	Greater than	1																								
	Lookup points by category+quantity (3 categories)	▶ ✎ 📄 🗑️ ☰																								

Features

Mix basic and tabular logic. Supports range and value lookups.

Users

Business Analysts,
Subject Matter
Experts.

Value

Realistic and works for
majority of the use
cases.

Example 3 - Advanced Logic

The screenshot displays the BaaS Business Logic As A Service interface. On the left, a list of rules is shown under the heading 'Rules'. The right panel, titled 'Try It - Rule Evaluation', shows the 'Form View' of the 'Utility Bill Logic' rule. It includes an 'Evaluation Payload - Utility Bill Logic' section with a 'Units Consumed' field set to 525. Below this is a 'Run Evaluation' button. At the bottom, a 'Derived Facts' table lists various calculated values.

Derived Facts (7)	
unitsTier1	100
unitsTier2	100
unitsTier3	100
unitsTier4	225
meterCharge	5
fuelCharge	3
utilityBill	109.25

Features

Support for common math expressions. Low code

Users

Business Analysts, Tech Support, System Integrators.

Value

Flexibility. Support for highly technical rules.

The Tech

API

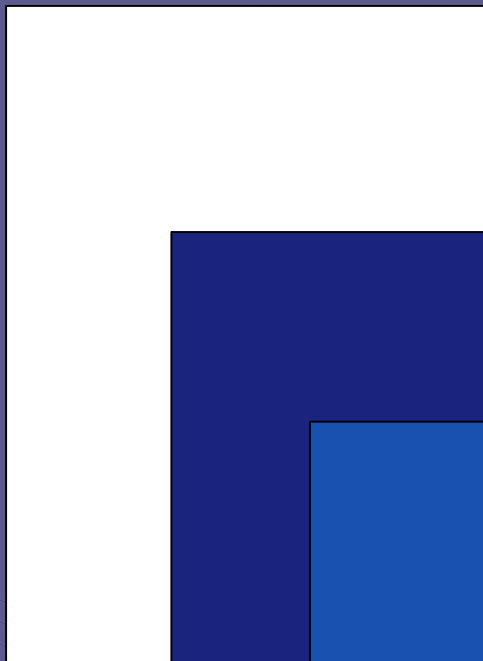

REST apis ready out of the box. Support for GraphQL and gRPC currently underway.

Cloud Native

Built for public and private clouds. Works with Docker for on prem installations.

AI

LLM with chat bot to explain and analyse the rules via natural language. Useful for quick references. Ongoing
